AMERICAN & FOREIGN PATENTS

AMERICAN & FOREIGN PATENTS

R. H. EDDY, Solicitor of PATENTS

(Late Agent of U. S. Patent Office, Washligton, under the Act of 1837.)

NO. 75 STATE, OPPOSITE KILHY ST.,

AFTER an extensive practice of upwards.

A of twenty years, continues to secure Patents in the United States; also in Great Britain, France and other foreign countries.—

Oaveats, Specifications, Bonds, Assignments and all Papers or Drawings for Patents, executed on liberal terms, and with despatch. Researches made into American or Foreign works, to determine the validity or utility of Patents or Inventions,—and legal or other advice rendered in all matters touching the same Copies of the claims of any Patent furnished by remitting One Dollar. Assignments recorded at Washington.

This Agency is not only the largest in New England, but through it inventors have all vantages for securing patents, or ascertaining the patentability of inventions, unsurpassed by if not immeasurably superior to any which can be offered them elsewhere. The testimonials below give, proof that none is MORE SUCCESSFUL AT THE PATENT OFFICE than the subscriber; and as SUCCESS IS THE BEST PROOF OF ADVANTAGES AND ABILITY, he would add that he has abundant reason to believe, and can prove that it no other office of the kind are the charges for professional services so inoderate The immense practice of the subscriber during twenty years past has enabled him to an cumulate a vast collection of specifications and official decisions relative to patents. These besides his extensive library of legal and mechanical works, and full accounts of yearing render him able, beyond question, to offer superor facilities for obtaining patents.

All necessity of a journey to Washington to procure a patent, and the usual great delay there are here saved inventors.

TESTIMONIALS.

I have had official intercourse.

CHAS. MASON," Commissioner of Patents.

"I have no hesitation in assuring Inventors that they cannot employ a person more competent and trustworthy, and more capable of putting their applications in a form to secure for them an early and accable consideration at the Patent Office.

EDMUND BURKE,"

Late Commissioner of Patents.

Boston, February 8, 1888.

"Mr. R. H. Eddy lass made for mo THIRTEEN applications, on all but one of which patents have been granted, and that one is now pending. Such ununistakable proof of great talent and shillify on his part leads me to recommend all inventors to apply to him to procure their patents, as they may be sure of having the most faithful attention bestowed on their cases, and at very reasonable charges.

JOHN TAGGART."

From Sept. 17th, 1857, to June 17th, 1858, the subscriber, in course of his large practice, made, on twice rejected applications, SIX.

TEDN APPEALS, EVERY ONE of which was decided in his favor, by the Commissioner of Fatents.

THE WHARF LOT, formerly called The Barlow, but now The Hammond Wharf; situated south of, and next to, the Marine Railway of W. E. & G. F. Crandall. Said Wharf Lot is fifty feet on Washington Street, running south to lot No. 2, then west sixty feet, then south fifty feet, then west, to the Chandel of the Harbor, which makes it one hundred feet on the west end, or one hundred feet on the west end, or one hundred feet wide its entire length, with the exception of sixty feet.

This wharf has many advantages over any other in Newport, both from its superior depth of water and its peculiar situation, hoing heamed in on all sides from wind or sea, and a sail versel could get under weigh with any wind, and go to see from the head of the wharf. For further particulars inquire of the subscribert, at 95 Thames Street.

DR. MOTT'S CHALVBEATE RESTORATIVE PILLS OF IRON

An aperient and Stomachic preparation of IRION purified of Oxygen and Carbon by combustion of Hydrogen. Sanctioned by the highest Medical Authorities, both in Europe and the United States, and prescribed in their practice.

The experience of thousands daily proves that no reparation of From panha remarked with it. Impusities of the blood, depression of vital energy, pale and otherwise sickly complexious indicate its necessity in almost every conceitable case. Hannoons in

with it. Impurities of the blood, depression of vital energy, pale and otherwise sickly complexious indicate its necessity in almost every conceivable case. Hanxoious in all maladies in which it has been tried, it has proved absolutely curative in each of the following complaints, viz:

In Debility. Nervous Allections, Emneciation, Dyspopsia, Constitution, Diarrhean, Dyscotry, Incipient Consumption, Serofulous Tuberculosts, Sait Rheum, Misneusstruation, Whites, Chlorosis, Liver Complaints, Chronic Headaches, Rheumatism, Intermittent Fevers, Pimples on the Fuce, &c.

In cases of ticneral Debility, whether the result of acute disease or of the continued diminution of nervous and muscular energy from chronic complaints, one trial of this restorative has proved successful to an extent which no description nor written attestation would render credible. Invalids solong bed ridden as to have become forgotten in their own neighborhoods, have studienly reappeared in the busy world as if just returned from protracted travel in a distant land.—Some very signal instances of this kind are attested of female Sufferers, emciated victims of apparent marasmus, sanguincous exhaustion, critical changes, and that complication of nervous and dyspeptic aversion to air and exercise for which the physician has no name.

In forvous Affoctions of all kinds, and for reasons familiar to medical men, the operation of this preparation of iron must necessarily be salutary, for, unlike the uld oxides, it is vigorously tonic, without being exciting and overheating; and gently, regularly apperient, even in the most obstinate cases of costiveness, without ever being a gastric purgative, or milicting a disagrecable sensation.

It is this latter property, among others, which makes it so remarkably effectual and

gastric purgative, or maccompanies sensation.

It is tills latter properly, among others, which makes it so remarkably effectual and permanent a remedy for Piles, upon which it also appears to exert a distinct and specific action, by dispersing the local tendency which forms them.

In Dyspensin, innumerable as are its causes, a single box of these Chalybeate causes, a single box of the Chalybeate and the causes are of the sufficed for the most habitual

In Dyspepsin, innumerable as are its causes, a single box of these Chalyteate Fills has often sufficed for the most habitual cases, including the attendant Costicueus; In unchecked Diarrhosa, even when advanced to Dysentery, confirmed, canaciating, and apparently malignant, the effects have been equally decisive and astonishing.

In the local pains, loss of flost, and stength, debilitating cough, and remittent herdic, which generally indicate Incipient Consumption, this remedy has allayed the alarm of friends and physicians, in several very gratifying and interesting instances.

In Scrotilious Tuberculous, this medicated iron has had far more than the good effect of the most cautiously balanced preparations of iodnic, without any of their well known liabilities.

The attention of females cannot be too cough, idently invited to this remedy and restorative, in the cases peculiarly affecting them.

In the cases peculiarly affecting them. In the the cases peculiarly affecting them. In the cases peculiarly affecting them. Sammatory—in the latter, however, more decidedly—it has been invariably well reported, both as alleviating pain and reducing the swellings and stillness of the joints and muscles.

In litermittent Fovers, it must neces-

swellings and stiffness of the joints and muscles.

In Intermittent Fovers, it must necessarily be a great remedy and energetic restorative, and its progress in the new settlements of the West, will probably be one of high renown and usefulness.

No remedy has ever been discovered, in the whole history of medicine, which exerts such prompt, happy, and fully restorative effects. Good appertite, complete digostion, rapid acquisition of strength, with an unusual disposition for active and cheerful exercise, immediately follow its use.

Put up in neat flat metal boxex containing 50 pills, price 50 cents per box; for sale by Druggists and dealers. Will be sent free to any address on receipt of the price. All letters, orders, etc., should be addressed.

Political.

To say that the nomination of the Hon. Abraham Liscoln and Hon. Hannibal Ramiin was received by the Republican press with satisfaction, would indeed be reling the truth, but by no means the whole truth; so far as we have examined our exchanges it is received not only with mtefaction, but with . warm enthusiasm. Boston Post and Boston Courier, supporters of Mr. Buchanan, have been, ever ince the nominations were sent East, filled with gail and wormwood, and if eny issues from those offices, The cause of years. such a tempest of wrath is patent; it is a certain fearful looking for of future events. certain fearful tooking for of future events. Whole families have frequeutly taken the The Boston Herald (Douglas) considers disease and died in a few hours. the nomination, a strong one, requiring a great effort to be beaten. So the Providence Post (Douglas.) The Providence Press, (Douglas proclivities) says :- " In the North West, he will run oetter, probably, than any one who could have been nominated instead. His personal populagity is deservedly great, and the enthusiasm for him will be such as to make the canvass exceedingly warm in that section, independent of the political issues at stake. The New York Herald (Buchanan) we are glad to say is bitterly opposed to the nominations.

Ratification meetings are being held all over the Northern States, and immense quantities of powder burnt. One hundred guns were fired in Providence by the Marine Artillery on Monday at noon, This is a decided improvement upon the foolish practice of making such discharges at 12 o'clock at night or thereabouts.

At Washington, on Friday, the Republicans formed into procession, headed by a band of music, and marched to Senator Hamblin's rooms in the Washington House, which was in a bluze of light from cellar to gallery. The nominee for Vice President was called out and made a short address, after which several other prominent Republicans were serenaded. The government officials engaged in the delightful recreation of showering the Republicans with bricks, paying stones, and such like confectionary, probably imagining that it was a carnival, and that they were in Rome. Possibly when the appropriations for the District of Columbia are before the House, these same rioters may feel the effects of their exploits upon the appropriadon um and turvigh mein upon their own pockets.

Mr. Douglas is reported to have said repeatedly in the presence of both Republicate and Democrats-that Mr. Linooln is a citizen of irreproachable chara cter and splendid talents, and that he will sweep the North West and carry Illinois by 20 000 majority.

We cull two selections from papers Ballimere Exchange, Anti Douglas, and National Intelligencer, at Washington, D. C. From the Exchange: "The Platform (Chicago) is as extreme as the most ers in durance vile. ardent adherent of the party could well desire it to be; and if we heritate to chan identified the men, the latter identifying a box acterize the nomination as weak, it is only on the presumption that there must be something about Mr. Lincoln's position or antecedents of which his opponents are ficer, who has experience to qualify him for altogether ignorant, but on which his supporters rely for success."

From the Intelligencer, Conservative: " Elected to the House of Representatives. and acting with the Whig party, he was hundred men. Quite a number of our citizens distinguished alike for the ability and amenity which he brought to the discharge fied with the principles of his party, and were accompanied by Greene's Brass Band, justly entitled by his private worth and which was up to the mark, as usual. proved ability to wear with dignity any honor it may be able to confer."

Coming as does this last extract, from so conservative and cautious a journal as the Intelligencer, and from the pen of one who is advanced in years, full of discretion, and one, withal, who has a personal and public acquaintance with Mr. Lincoln, it is to be taken, we think, with full reliance upon its soundness as a matter of opinion.

It Extends.

By the latest advices it appears that the cattle disease is extending its destructive influences. It has reached New Hampshire and Connecticut, positively. It also appears that unprincipled persons-we cannot call them men-have sold off their cattle after they knew that they were diseased, to be driven they cared not where, so long as they obtained a small pittance for them. NEWPORT, May 23, 1860. MR. EDITOR:-Henry Bull, in a communi cation in your paper this morning, states that on two occasions be has sent notice "to the Mayor or Street Commissioner, that if the City Authorities did not intend to replace the wall so the same condition they found it, he would cause the same to be done upon their making an official requisition upon him to that effect." I have never received any communication from him in regard to this matter. He siso says,-"and, but for a miserable attempt on the part of the Mayor and City Marshal to make use of their official position, apparently to gratify a private and cowardly malevolence, in a matter omewhat similar to this, and I am sought to be made the victim, I might have long since and obserfully at my own expense repaired the above damage," &c. ROBERT SEATLE City Masshri. Newport, May 23, 1880.

Good Hanl.

Yesterday, City Marshal Seatle made a splendid run. If the soveral Presidential candidates could only make as good a run, we should like to witness the exploit, and enjoy the sport. It would be something of the same sort of a performance as was Jack's triangular duel with the additional antagonist.

But to return from this digression. Iwo men, Carlo Dani and Giuseppo Coppini, came down all the way from Boston, via stamped to represent coin, in shape and size corresponding to half dollars. They landed from the Perry, night before last, and commeaced operations by celling one of said bogus articles at Mr. Henry Young's store, corner of Mill and Thames Streets, in excumpe for crackers. Subsequently they traded upon similar principles, with Mr. John J. Stacy, on against any other Democrat than himself Thames Street, John Starne, on Washington Square, and Lawto Easton, on Broad Street. Having left town by the West Road, and the Marshal, being satisfied of the fact, he started printed in Slaveholding communities the on a stern chase. This is proverbially a hard chase, but in this case it proved not so to be; for, about eight and a half miles out. Mr. Sea. tle overhauled the culprits, and by the mid of Mr. Easton was soon able to ledge his prison-

BEST FAUIT FOR MARKET PURPOSES.—A correspondent of the Genessee Farmer and swret the question, what are the best six arriveties of pears and apples for market and gen rai eultivation, as follows:

After hearing and reading all that has been said and writise on this subject for the last ten years, and carefully noting the experience of preducers and desires as to demand of the market, and consumers, but like hesitation need be felt in maming the best six varieties of pears and apples for market, as to the order in which they should be named for their respective merits, a good deal of difference will undeubtedly be found expressed. For general markets have should be mamed for their respective merits, and cultivation, I think the pears should be manded as follows: Bartlett, White, Dy's enne (or Virgalian), Louise Bonne de Jersey, Dunchesse d'Angulemo, Vicar of Wiukfield, and Baster Beurre Perhaps the Seckis might be substituted for one of the last two; but as these are the only winter pears they had better be retained, as the market demand must be supplied in winter, as winter should as in assminer. The demand for the above varieties is always greater than the supply, are even at the highest pinces.

The prosent water works of Paris have been erected at a nost of three millions of dollars, and are capable of furnishing thirty millions of gations daily. It is now proposed to construct an aqueduct from the Somme-Soude, at a point between Epernay and Cralons-sur-Maine, a distance of nearly 124 miles. This, with the necessary reservoirs, will cost nine millions of dollars. It will furnish about twenty millions of galions per day, and the reservoirs will contain two-and-a-half days' supply. Large portions of the city are now teo high to be reached by the present supply of water. The new aqueduct will have sufficient head of water to reach the highest dats of the highest portions of the city assily Additional sewerage is also to be provided, at an expense of eight millions of dollars. Two immense lineal sewers are to be built alseng the Seine, into these, the sawers from the city will empty, and the drainage will thus be carried off into the country, which will preserve the purity of the river.

WATER OIL!!

HEBARD'S PATENT WATER OIL, to burn in Kerosene Lamps, without the smell and snoke of the Coal Oils, is the greatest artificial light yet discovered. It gives a steady, clear, soft light and dors not choke the lungs with foreign matter, such as results or Coal Gas.

The flame can be regulated to afford any amount of light desired, from that of the large solar lamp to the feeblest taper. We therefore claim for the Water Oil the following as some of its leading characteristics:

1. It smits no footid udor.

2. It will burn in Kerusene Lamps without alteration. WATER OIL!!

attention.

3. It is essentially an Oil, and yet will not grease the most delicate fabric.

4. It is less volatile than other oils, consequently will not consume as rapidly.

5. The famo is more purely white and soft than that of any other Oil or Fluid. Therefore less injurious to the eyes.

6. The wick may be raised to a great height and breadth, giving an immense illuminating power willout producing emoke.

7. Its great specific gravity renders it not only safe, but the most economical Oil in existence.

istence.
8. It does not crisp the wick like Oils, nor

deposite any carbonaccous fuel upon it.

1. It does not waste, as every globule of Oil and every particle of Water is entirely consumed.

The following is the Certificate from Dr. Hayes, an the illuminating power of the WATER OIL as compared with the best article of Kerosene Oil in the market:

16 BOJISTOS KREET, 14th Feb. 1860.
Results of comparison of the light of two lamps, one fed with Kerosene Oil, and the other with Water Oil, furnished by B. F. Hebard.

The Kerosene Lamp when lighted soon increased its volume of flame, so as to present a dull halo above the brilliant part; it was adjusted to the highest point without producing smoke. On lighting the lamp fed with Water Oil, it was found that its flame was luminous and might he much extended, without the production of smoke. A definite point perfectly practical, was reached, when the Kerosene Lamp belog 105, the Water Oil Lamp afforded the hight of 13t, without a trace of smoke emitted. The Water Oil pormits of any diminution in the same without loss of economy.

Respectfully,

A. HAYES, M. D., State Ausayer.

AND NOSTRUM MAKERS.

Through the ignorance of the Quack Doctor, knowing no other temedy, he relies upon MERGURY, and gives it to all his patients in Pillo, Drope, &c.; so the Nostrum maker, equally ignorant, adds it to his so-called Extract, Specific, Antidote, &c.; relying upon its effects in curing a few, in a hundred, it is trumpeted in various ways throughout the land; but, alas' nothing is said of the balance; some of whom die, others grow worse, and are left to linger and suffer months or years, until relieved or cured by competent Physicians.

Ayer's Sarsaparilla

The mines from which this Coal is taken were never in so promising a condition as at present, and such improvements have been made for preparing and screening it as watrant us in saying that we believe the Coal with the saying that we believe the fore. The superior quality of the Franklin Coal having become fully established, the demand has rapidly increased, and an evidence of its great popularity is the fact that several desires have adopted its name in full or in part, thereby hoping to introduce other kinds of inferior Coal by which the public have often been deceived.
